Division of Investigation
U. S. Department of Justice

John Edgar Hoover, Director

Washington, D. C.

The Division of Investigation, U. S. Department of Justice, is charged with the duty of investigating violations of the laws of the United States and collecting evidence in cases in which the United States is or may be a party in interest.

The Division does not have investigative jurisdiction over violations of Counterfeiting, Narcotic, Customs, Immigration, or Postal Laws.

However, the Division of Investigation will immediately institute investigations of alleged violations of Federal Laws other than those listed above.

The following list indicates some of the major violations over which the Division has investigative jurisdiction:-

- National Motor Vehicle Theft Act
- National Bankruptcy Act
- White Slave Traffic Act
- Impersonation of Government Officials
- Larceny of Goods in Interstate Commerce
- Cases involving transportation in interstate or foreign commerce of any persons who have been kidnapped
- Theft, Embezzlement or Illegal Possession of Government Property
- Antitrust Laws
- National Bank and Federal Reserve Act Violations, such as embezzlement, abstraction or misapplication of funds
- Crimes on any kind of Government reservation, including Indian Reservations or in any Government building or other Government property
- Neutrality violations, including the shipment of arms to friendly nations
- Frauds against the Government
- Perjury, embezzlement, or bribery in connection with Federal Statutes or officials
- Crimes on the high seas
- The location of persons who are fugitives from justice by reason of violations of the Federal Laws over which the Division has jurisdiction, of escaped Federal prisoners, and parole and probation violators.

It will be appreciated if information in the possession of law-enforcement officials concerning the above listed violations is promptly forwarded to the Special Agent in Charge of the nearest field office of the Division of Investigation, U. S. Department of Justice. If the information indicates that immediate action is necessary, telegrams marked "Government Rate Collect" or telephone calls will be accepted. The address of each of the Field Offices of this Division appears on the inside back cover of this bulletin.

**Division of Investigation
U. S. Department of Justice
John Edgar Hoover, Director
Washington, D. C.**

Vol. 2 No. 11

November 1, 1933

At this time I desire to bring to the attention of law enforcement officials who contribute fingerprints to the Identification Unit of this Division, several features of its service which I feel should be utilized more liberally to insure the most effective results.

To provide for continuous service a permanent night force is now on duty in the Identification Unit at Washington, engaged in checking and extending the technical files and in handling current fingerprints or inquiries of a special character. Interested correspondents are invited to avail themselves of this service at all hours, through the use of the telegraph, if practicable, or the medium of fingerprints despatched via special delivery, to insure prompt delivery at Washington in instances where it is necessary that telegraphic advice be furnished indicating the result of a search of the technical files.

Law enforcement agencies also are invited to use more freely the Division's facilities for the entry of wanted notices in the Identification Unit. Although about 350 fugitives are identified monthly through this most important adjunct to the work, it is felt that this service may be extended to advantage. The Division has compiled a form to be used by contributing officials in requesting the posting of such wanted notices. A supply of these forms will be sent to each contributor of fingerprints, in the near future, to be used at his discretion and additional forms will be furnished upon request in the usual manner.

Inquiries are received in this Division frequently as to its policy in replying to fingerprints received by air mail or special delivery. All such prints are answered in the same manner as they are received; i. e., if by air mail, the replies are sent by air mail and if by special delivery, the replies are forwarded by special delivery. No postage need be forwarded to secure the return of the records by these special services.

Another matter of importance is that concerning deceased persons. The Division furnishes "Record of Death" forms to its contributors to report persons who were fingerprinted by them and whose prints were forwarded to the Division and who are known to be deceased. Full cooperation in these notifications is of great assistance in removing inactive records from the files.

These observations are given for the purpose of improvement in our service. I would like to know that each contributor of fingerprints to this Division feels he is an important part of a cooperative endeavor which may attain its maximum efficiency only when each interested agency affords the most complete assistance possible. All suggestions to enable the attainment of this objective are invited.

John Edgar Hoover

Director.

STATISTICS COMPILED FROM FINGERPRINT CARDS RECEIVED IN THE DIVISION
OF INVESTIGATION, U. S. DEPARTMENT OF JUSTICE FROM
JANUARY 1 TO SEPTEMBER 30, 1933

During the first nine months of 1933 the Division of Investigation examined the arrest records of 240,871 individuals whose fingerprint cards were received from local law enforcement officials throughout the country. There were 12,418 individuals 19 years of age and 12,040 persons aged 22 who were arrested during the nine-month period. The number of those arrested who were 19 years old was greater than the number for any other single age group, and the following serious offenses were among those with which they were most frequently charged.

Larceny-theft	2,102	Auto theft	850
Burglary-breaking		Assault	503
or entering	1,917	Rape	215
Robbery	967	Criminal homicide	129

Similarly large proportions of youthful offenders of other ages were charged with those offenses.

One of five persons arrested was under 21 years of age, and an additional one was between 21 and 24 years of age. The third of each five arrested and fingerprinted was aged between 25 and 29 years. In other words, three of each five arrested were under 30 years of age.

Of the total of 240,871 arrest records examined, 17,315 (7.2%) were those of females. The following charges are those on which they were most frequently arrested:

Disorderly conduct, drunkenness and vagrancy	3,284
Larceny-theft	2,781
Suspicion	2,394
Sex offenses	2,186
Assault	1,470

Negroes constituted 23.7 per cent of the total number of arrest records examined. However, the percentage of negroes arrested in the following instances was considerably higher:

Criminal homicide	33.2
Assault	40.6
Weapons; carrying, possessing, etc.	34.0
Gambling	44.7

Expressed in terms of the number per 100,000 of the general population, the proportion of whites and negroes arrested for certain offenses is as follows:

7-21-33.

FPC: 8 S 11 R O 10 Ref: 3
S 12 W OI 7 11

Richard J. Brodell, Jess Clark,
Jess E. Clark, Carl Keeling, Earl Keeling,

Number per 100,000 of the general population.
(Exclusive of those under 15 years of age.)

	<u>Whites per 100,000 of White Population</u>	<u>Negroes per 100,000 of Negro Population</u>
All offenses	231.4	711.4
Criminal homicide	3.8	18.7
Assault	13.0	88.4
Weapons; carrying, possessing, etc.	3.8	19.9

Thirty-five per cent of the 240,871 individuals whose arrest records were examined during the first nine months of this year had previous fingerprint records on file in the Division of Investigation. This means that in 84,776 cases the individuals had been previously arrested and fingerprinted and copies of the prints had been forwarded to Washington. It does not mean, however, that the individuals had been previously convicted of the same offense or of any other crime. On the other hand, many of the individuals of whom the Division had no previous fingerprint record had no doubt been previously arrested. This fact is frequently noted on records received. The percentage having previous criminal records varies from 58.6 for those charged with violation of narcotic drug laws to 19.2 for those arrested on a charge of criminal homicide.

It should be noted that the tabulation of data from fingerprint records does not include all persons arrested, since there are individuals arrested for whom no fingerprint records are forwarded to Washington. Furthermore, the number of persons arrested should not be treated as equivalent to the number of offenses known to have been committed, since one person may have committed several offenses, while, on the other hand, several persons may have been involved in the joint commission of a single offense.

OFFENSES KNOWN TO THE POLICE
JULY TO SEPTEMBER, 1933

During 1933, the Division of Investigation has received monthly crime reports from the Police Departments in 97 per cent of the cities with population in excess of 100,000. In addition reports are received from 84 per cent of the cities with population between 10,000 and 100,000. These reports are based on the number of offenses known to the police, and are generally recognized as the best index to the amount of crime committed.

Tabulations based on the monthly crime reports are published quarterly in the bulletin entitled, Uniform Crime Reports. However, as of probable interest to law enforcement officials generally there is shown below the daily average number of offenses reported during the third quarter of this year by the police departments in 76 cities with a population in excess of 100,000, the aggregate population represented being 25,454,938.

Examination of the table indicates that in most instances the variation in the averages is slight. Murder and nonnegligent manslaughter, robbery, assault, and auto theft showed a decrease in August, followed by an increase in September. The averages for manslaughter by negligence, rape, and burglary-breaking or entering were higher in August than they were in July or September. The figures for larceny-theft show a consistent upward trend during the three-month period.

The data in the following table are intended to indicate variations in the amount of crime during the third quarter of 1933 only. Obviously the period covered is too short to justify conclusions as to whether crime in the United States is increasing or decreasing.

Daily average, offenses known to the police, 76 cities over 100,000,
July to September, 1933
(Total population, 25,454,938)

	Criminal homicide		Rape	Rob- bery	Aggra- vated as- sault	Bur- glary-- break- ing or enter- ing	Larceny-- theft	Auto theft
	Murder, nonneg- ligent man- slaugh- ter	Man- slaugh- ter by negli- gence						

Number of offenses:

July	199	106	122	2,574	1,394	9,107	16,747	8,545
August	185	112	162	2,394	1,359	9,281	17,588	8,030
September	190	106	125	2,342	1,328	8,864	17,267	8,288

Daily averages:

July	6.4	3.4	3.9	83.0	45.0	293.8	540.2	275.6

INTERESTING IDENTIFICATION #153.

HORACE JACKSON

FUGITIVE WANTED FOR MURDER
IDENTIFIED BY FINGERPRINTS

In June of 1930, advice was received in the Identification Unit of the Division of Investigation that the Superintendent of Police at Michigan City, Indiana, desired the apprehension of one Horace Jackson in connection with a murder charge. At that time it was observed that this individual in 1924 had been received in the State Prison at Jackson, Michigan, to serve one-half to 1 year for violation of the liquor law. When advice regarding the murder charge was received in the Identification Unit the usual wanted notice was placed in the fingerprint files.

No information concerning Jackson's activities came to the attention of the Division of Investigation until September 27, 1933, when a fingerprint card was received from the Police Department at Newark, New Jersey, reporting the arrest of one William Jackson, charged with being a gambling house proprietor. When these fingerprints were classified and searched, it was found that this person was identical with the fugitive wanted for murder at Michigan City, Indiana. The authorities at Michigan City and Newark were informed immediately of this identification. Advice has now been received from the Superintendent of Police at Michigan City that arrangements are being effected to secure the removal of Jackson to that jurisdiction to answer the murder charge pending against him there.

The identification in this case is but one of approximately 350 effected each month by the Division of Investigation when fingerprints received from law enforcement officials are classified and searched through the technical files. All law enforcement officials are invited to make liberal use of the facilities of the Division in the posting of wanted notices in an endeavor to secure even more effective results in the identification and apprehension of persons who are fugitives from justice for any reason.

INTERESTING IDENTIFICATION #154

D. SULLIVAN, alias DALLAS NEW.

IDENTITY OF DECEASED INDIVIDUAL ESTABLISHED
THROUGH COMPARISON OF FINGERPRINTS

Frequently the Division of Investigation receives in its Identification Unit from various law-enforcement officials, fingerprints of amnesia victims or deceased persons whose identities are unknown. Through a comparison of these fingerprints with those in the files the Division is enabled on many occasions to inform interested agencies of the correct identities of such persons so appropriate steps may be taken to locate their relatives.

The fingerprints of many individuals killed while resisting arrest or while engaged in the commission of felonies are identified in this manner. In addition, individuals who suffer accidental deaths often are identified through a comparison of their fingerprint records. Among the cases of this latter group which have come to the attention of the Identification Unit recently is the case of the unknown man who was found badly injured beside a railroad track near Phoenix, Arizona, and who died before reaching the hospital. Information appearing on the fingerprint card of this individual forwarded to the Division by the Sheriff's Office at Phoenix, Arizona, reflected that this person had in his possession saws, files, small picks and other articles which could be used in picking locks. When the fingerprints of this person were classified and searched in the technical files, he was found to be identical with D. Sullivan who, in November, 1917, had been received in the State Penitentiary at Jefferson City, Missouri, to serve two years for grand larceny; who as Dallas New, in October of 1924, had been received in the State Penitentiary at Lansing, Kansas, to serve five to ten years for burglary in the second degree and larceny, and who, in May of 1931, had been received in the United States Penitentiary at Leavenworth, Kansas, as Dallas New, to serve two years for theft from interstate shipment.

Advice as to this identification was communicated immediately to the officials at Phoenix, Arizona. The railway police officials also were interested in securing this information. Data with reference to previous criminal activities are frequently of assistance to law-enforcement officials in making appropriate disposition of the remains of deceased persons.

All interested agencies which transmit fingerprints to the Identification Unit are invited to forward fingerprints of this character.

N O T I C E

All officials sending fingerprints to the Identification Unit of the Division of Investigation are invited to avail themselves of its special service in unusual or important cases.

It is, of course, fundamental that fingerprints should be sent to the Division immediately after any persons are arrested so any existing criminal history may be furnished to the interested officials and so the said persons may be held in the event they are listed as fugitives in the Division's file. However, there are many cases of special or particular consequence wherein interested agencies may desire to transmit fingerprints to the Division by air mail or special delivery or both.

It is the practice of the Division upon the receipt of fingerprint cards forwarded in this special manner, to give immediate attention to the said cards and to expedite replies thereto which are sent via air mail or special delivery, whichever method would insure the most expeditious service considering the fact that air mail alone does not guarantee delivery on Sundays and holidays. Postage for these special cases is provided by the Division.

Further, whenever records are desired immediately and request is made for telegraphic reply, telegrams are dispatched by the Division, collect, to the agencies desiring the same. The requests for this service may be noted on the fingerprint cards concerned in distinctive lettering, no other communication being necessary. It is suggested that the request for telegraphic advice indicate specifically the service desired, such as:

Wire only if record

Wire if fugitive

Wire reply

The Division has observed that through delay in the transmittal of fingerprint records, badly wanted fugitives sometimes are released before notification of their whereabouts can be transmitted to interested authorities. It is felt that through a more liberal use of the air mail and special delivery methods of the transmittal of fingerprint records, more effective service can be accorded interested law-enforcement officials.
